MACHINE TOOL TECHNOLOGY

About Us:

Riddhi Machine Tool Technology is a precision metal cutting tools manufacturer delivering solid carbide and PCD solutions through advanced and innovative technologies. The company designs and manufactures using state-of-the-art CNC, 5-axis SAACKE grinding, and VOLLMER Wire EDM machines, serving the automotive, aerospace, and precision engineering industries, aligned with the vision of “Make in India.”

Mission:

To advance the “*Make in India”* vision by manufacturing world-class precision cutting tools that meet global standards of quality and performance.

Vision:

To be a trusted and reliable one-stop solution for advanced precision cutting tools across automotive, aerospace, and engineering industries.

Our Purpose & Philosophy

At RMTT, our Objective is to be more than a supplier — we aim to be a **trusted manufacturing and technology partner**.

Our approach is guided by three core principles:

- **Customer-Oriented Thinking** – understanding real application needs
- **Technology-Driven Solutions** – adopting advanced processes and innovation
- **Service Excellence** – long-term support and responsiveness

These principles shape every product, process, and partnership we build.

Manufacturing Excellence

Aligned with the **Make in India** vision, Riddhi Machine Tool Technology has invested in a **state-of-the-art manufacturing facility** equipped with advanced global technologies, including:

- SAACKE **5-Axis Tool Grinding Machines**
- Swiss Cylindrical Grinding Systems
- Advanced Edge Honing and Polishing Equipment
- Walter Helicheck- Measuring Machine
- Vollmer Wire EDM Machine

Our manufacturing standards match **German quality benchmarks**, ensuring high accuracy, process consistency, and extended tool life across applications.

Products & Capabilities

RMTT offers a comprehensive range of precision cutting tools and special tooling solutions, including:

- Special solid carbide drills and step tools
- Solid carbide reamers, whole mill and end mills
- High-polish end mills for aluminium applications
- PCD tools, brazed carbide reamer & special brazed carbide

All tools are engineered with internal coolant options, advanced coatings, and optimized edge preparation, designed to meet exact customer and application requirements.

RMTT Product Overview

Product overview:

Solide Carbide

Brazed Carbide

PCD

High-Performance Solid-Carbide Endmill

Finishing Application Solid Carbide Endmill

General Application Solid Carbide Endmill

Ball nose Solid Carbide Endmill

TAPERED BALL NOSE ENDMILL

Highly accurate
radius tolarence +/- 0.005mm

Neutral, easy cut geometry

High performance
coating

- Ideal for HSC machining and 3D machining
- Stable center geometery

Applications- stainless steel, Tatanium alloys

Solid Carbide Tools- Aluminium Application

Micro cutting edge geometery

High polished flutes

High performance end mills

High polished flutes

Drills and Step Drills

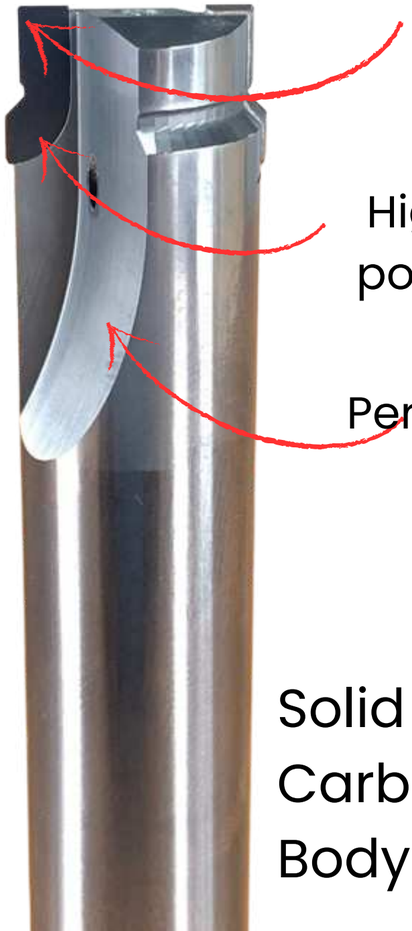

Special Multi-Grooving tool

Applications:

1. Hydraulic manifold spool bore internal grooving
2. Component material- grey cast iron
3. One-shot solution which can reduce the machine time by as much as 70%
4. Tight tolerances are built into the tool for more precise machining
5. Designed to avoid vibrations, making it more reliable
6. Can be used in cast ironaluminium and steel materials

PCD Technology

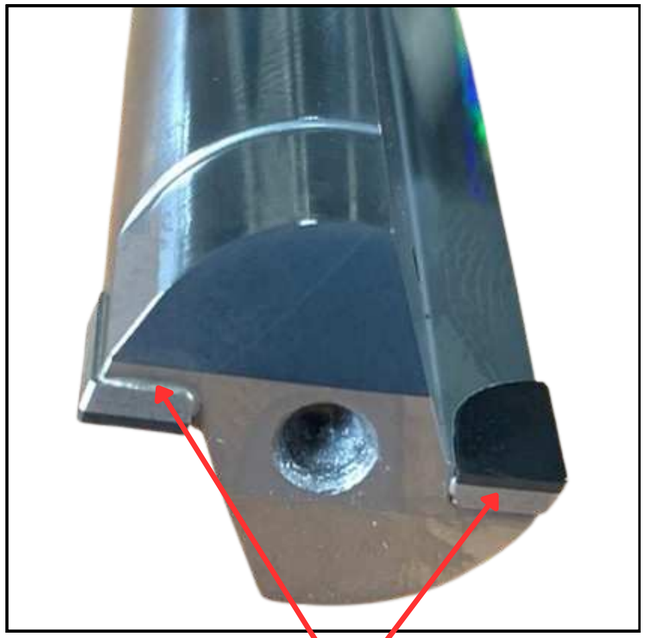

Well balanced PCD material

High quality pocket seats

Perfect smooth flutes

Solid Carbide Body

Seameless Brazing

Wire EDM+ Lapping and grinding cutting Edges

Steel Body

Steel Body– PCD

HSK Shank

Cylindrical HA shank

Module shank

Carbide body - PCD Tools

Single step and Multi step PCD Tools

PCD thread mills

Riddhi
MACHINE TOOL TECHNOLOGY

PCD Milling Cutters

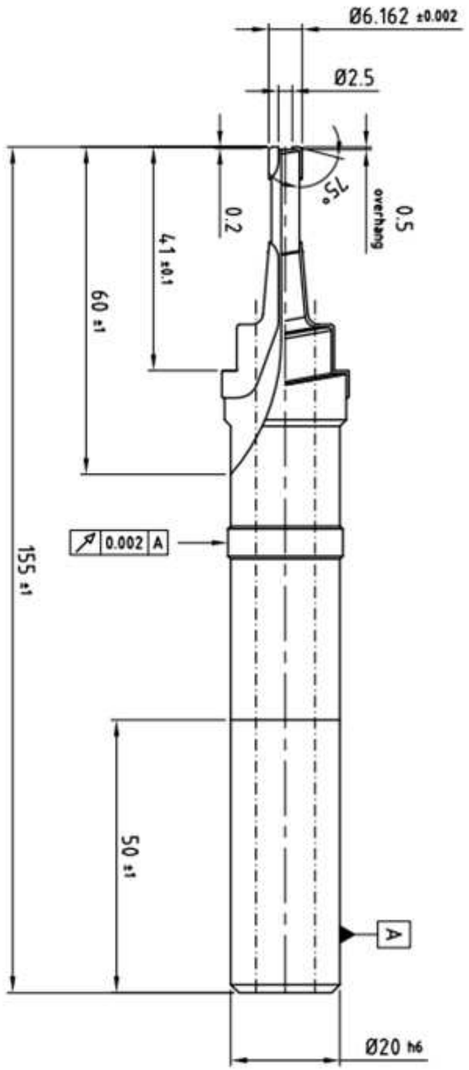

Valve seat and guide - PCD Tool

Application: Cy head Valve seat rough profile Intake+Exhaust

Tool : Steel body+ PCD tips

Challenge: To improve cycle time and profile accuracy, replaced brazed carbide

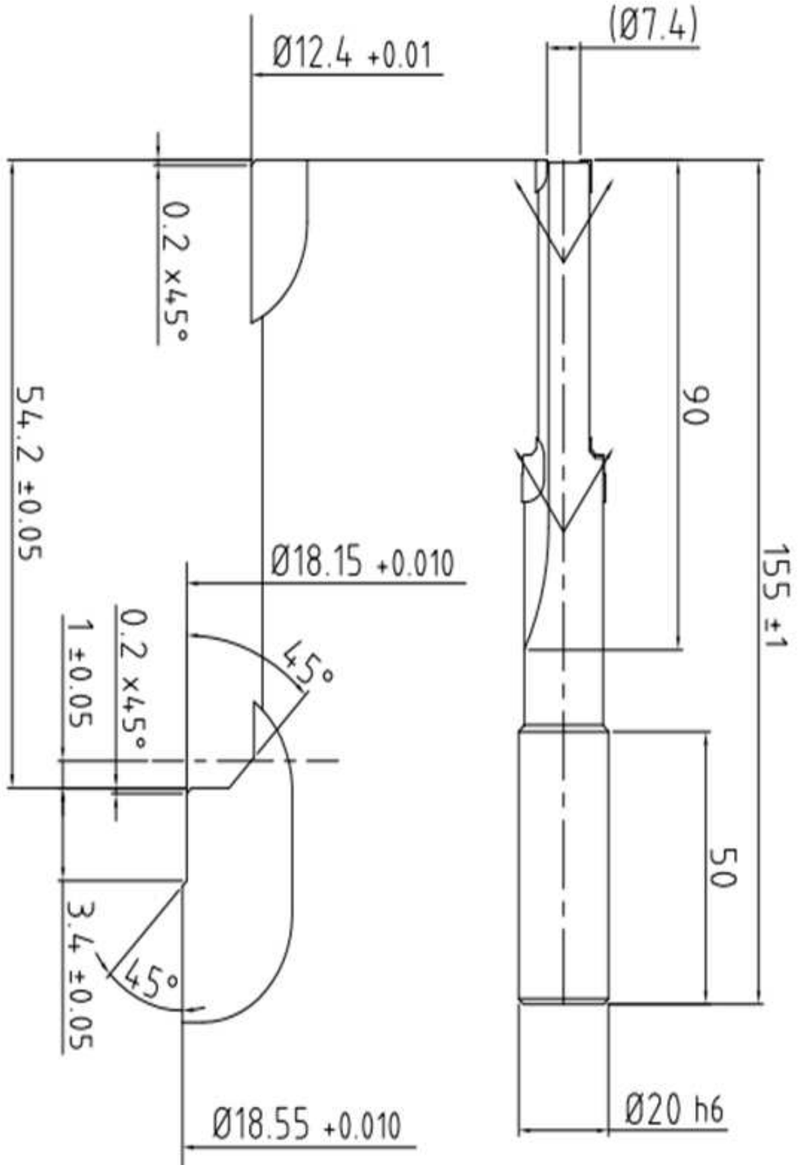

Injector Bore PCD Tool

Application: Cy head injector bore for 4 Wheeler

Tool : Solid carbide body with PCD tipped

Challenge: long taper finish 0.4 Ra and size consistence with visible high quality finish.

Master cylinder – Main bore

Application: Master main bore

Tool : Solid carbide body with PCD

Challenge: Surface finish and clear from blow holes

Two wheeler – Brake caliper

Input

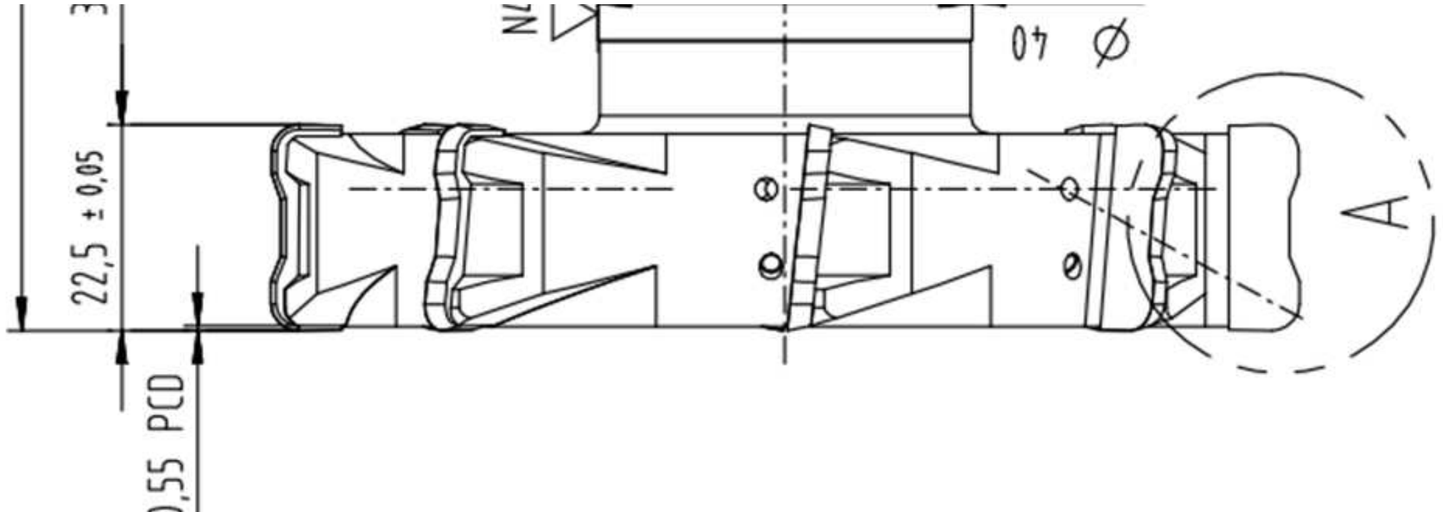

Output

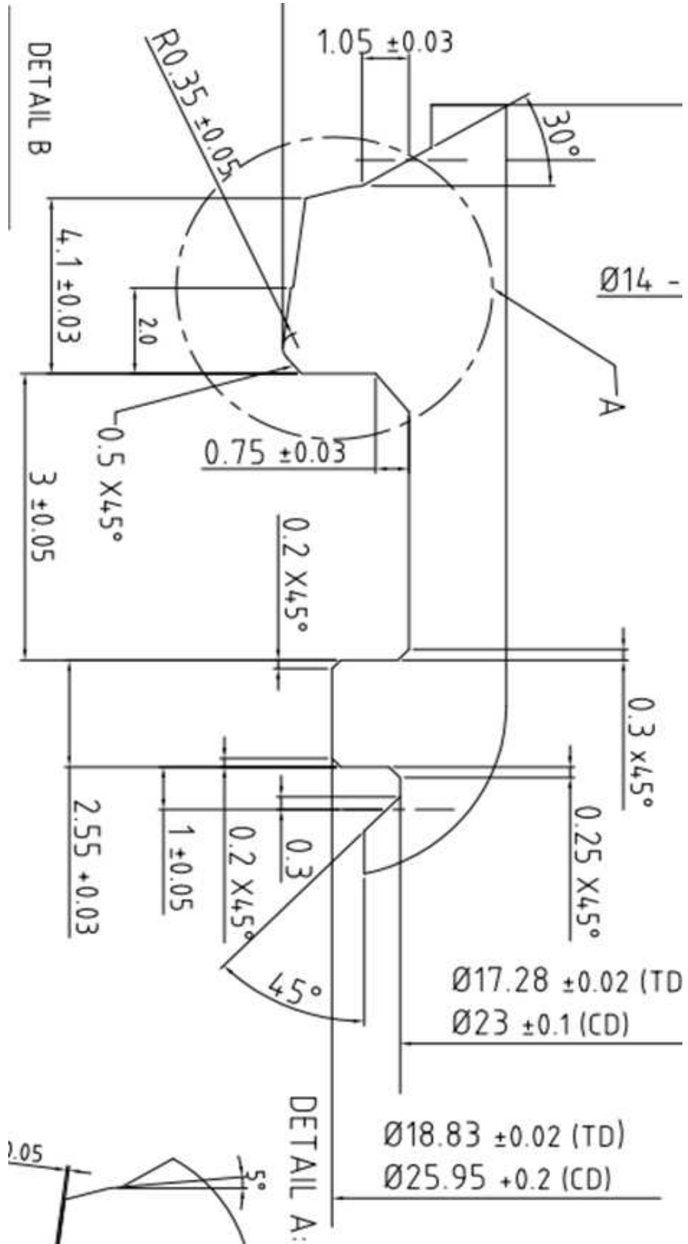

PCD Profile milling cutter

PCD Profile milling cutter- Boot & Seal groove milling

- Solid carbide body
- Z-4 High quality PCD tips
- Internal coolant supply
- One shot finish
- Highest seal groove surace
- Consistent profile accuracy achieved

PCD Reamer-Two-Wheeler Shock Absorber

Module 60, run out compensation system

Component: Two-Wheeler Shock Absorber

Material: Aluminum Die Casting

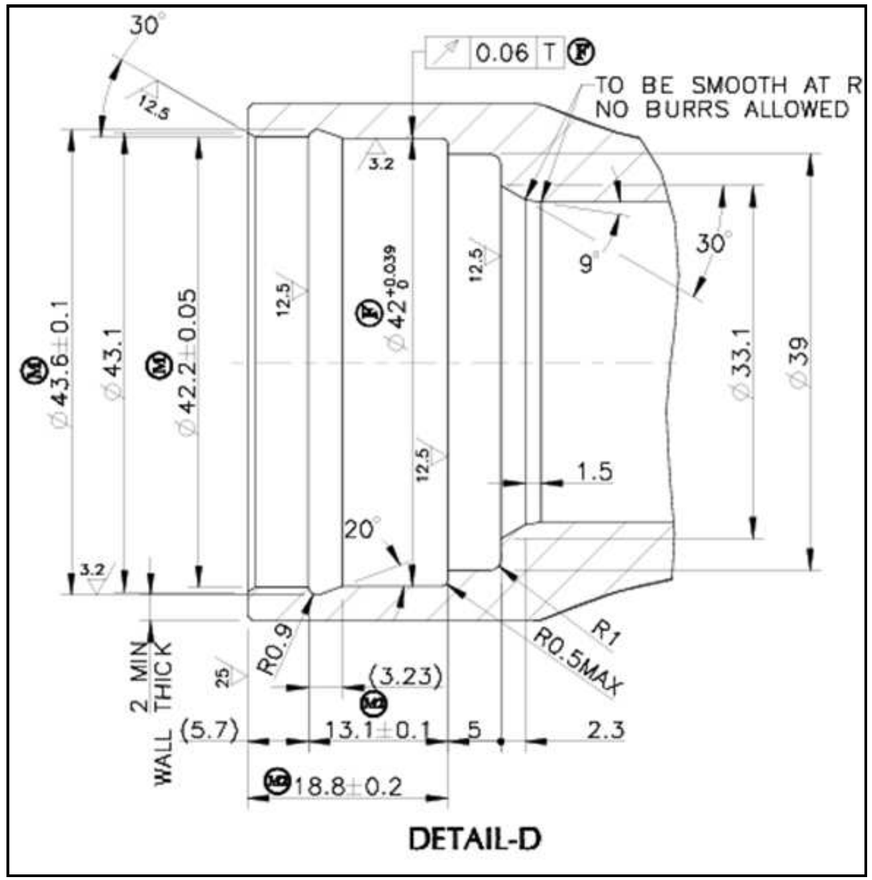

Operation: Precision hole finishing (reaming)

Objective: Achieve high dimensional accuracy and superior surface finish for smooth piston movement

Riddhi
MACHINE TOOL TECHNOLOGY

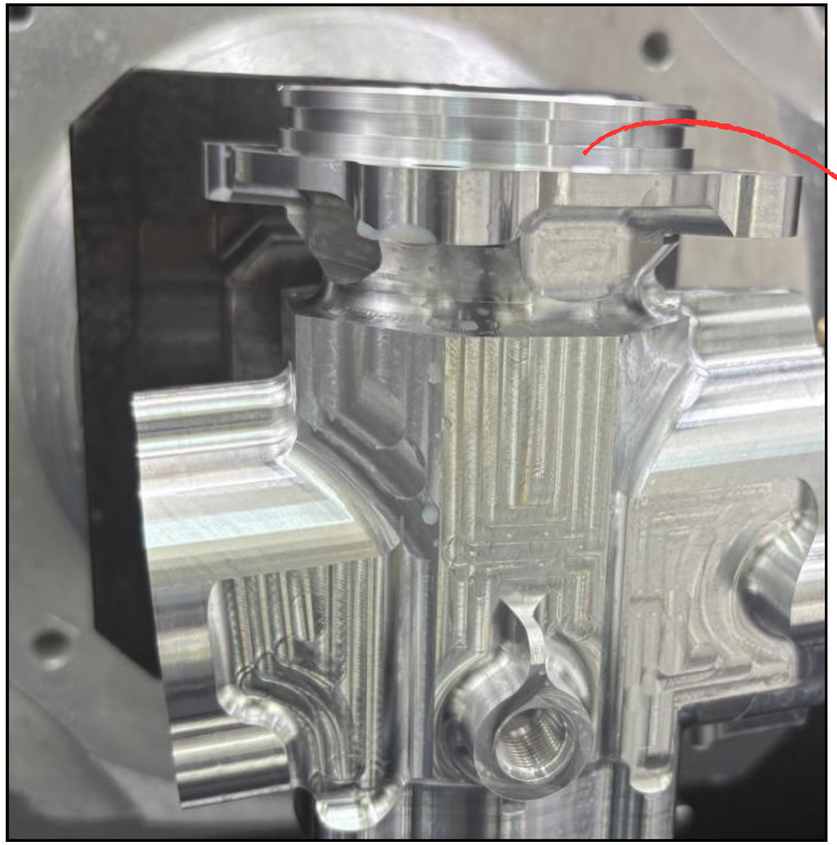

PCD Reamer-Two-Wheeler
Shock Absorber

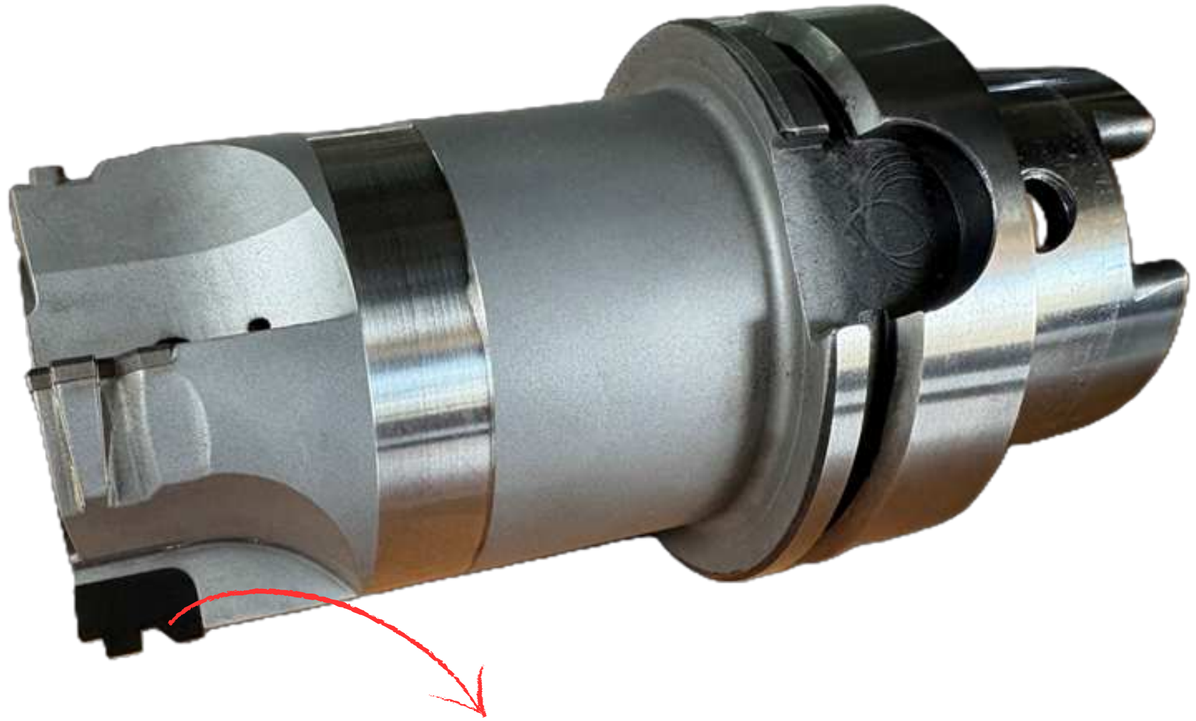

- Module 70 connectin
- Z-4 High quality PCD tips
- Internal coolant supply
- One shot finish
- 5 steps in one tool
- Vc=210 mtrs/min
- Feed= 0.3 mm/rev
- BT30 Spindle machine

PCD form groving cutter

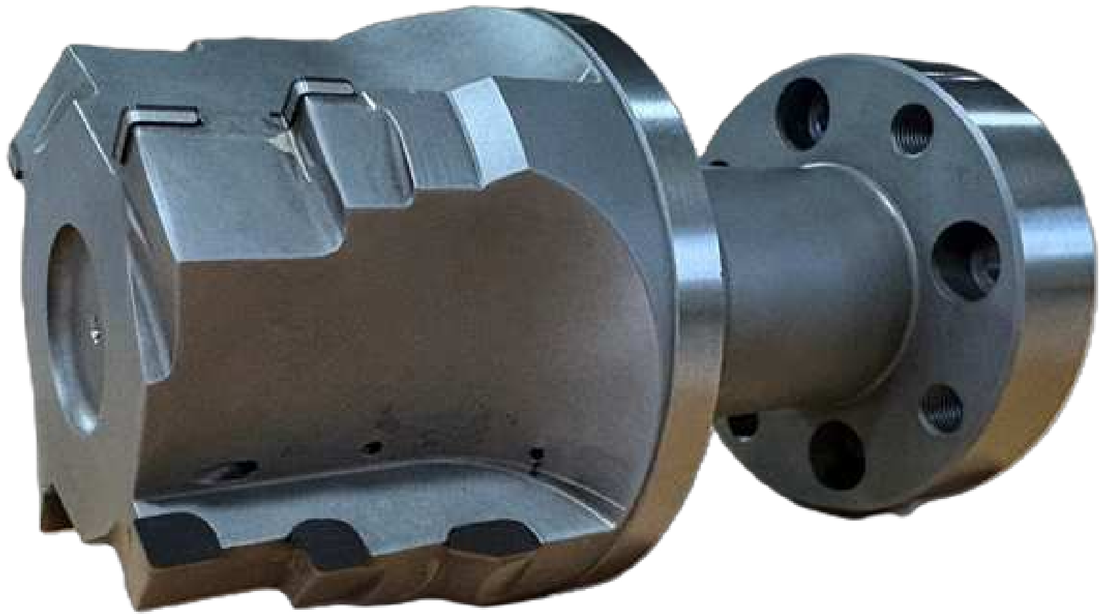

Outside diameter profile grooving

PCD Tip with profile

PCD Step Three Step Reamer

Application:

Aerospace component finish reaming

Brazed carbide special tool

Brazed Carbide two step reamer

Brazed Carbide T-Slot Cutter

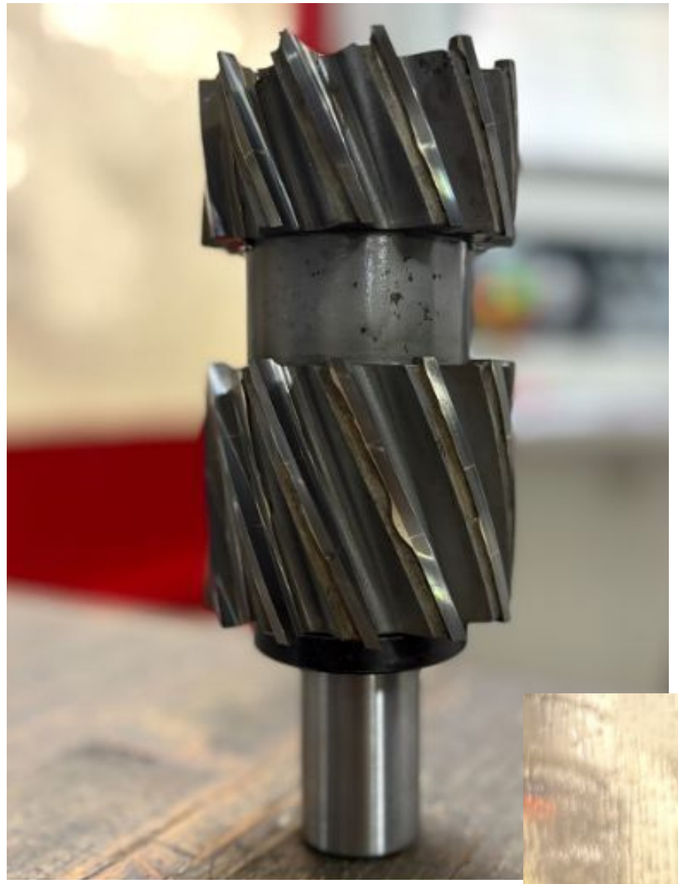

Product Differentiation

Cost- effective solutions amid volatile carbide prices

Riddhi
MACHINE TOOL TECHNOLOGY

Brazed Shell Milling Cutter

Engineered for hydraulic and excavator component machining

Material: Grey Cast Iron
Diameter: 80 mm
Length: 110 mm

Designed to deliver consistent performance and machining efficiency in demanding industrial applications
